Solution

As the sacrifice made by the existing partners is not mentioned, it is assumed that they sacrifice in their old profit sharing ratio 5:3. Therefore, sacrificing ratio is 5:3.

Arun, Babu and Charles are partners sharing profits and losses equally. They admit Durai into partnership for 1/4 share in future profits. The goodwill of the firm is valued at ₹ 36,000 and Durai brought cash for his share of goodwill. The existing partners withdraw half of the amount of their share of goodwill. Pass necessary journal entries on the assumption that the fluctuating capital method is followed.

Solution

Durai's share of goodwill = 36,000 × 1/4 = ₹ 9,000

As the sacrifice made by the existing partners is not mentioned, it is assumed that they sacrifice in their old profit sharing ratio 1:1:1. Therefore, sacrificing ratio is 1:1:1.
