Emergency Planning: A comprehensive risk analysis indicating the impact of consequences and practiced emergency procedures should be done. This can be done by communities as well as national or regional corporation authorities.

Training: Proper training of employees and protective services should be done.

Fact File

8.3.5 Road accident

It is estimated that 1.34 million people are killed in the road accidents every year. Road accident is the 8th leading cause of death globally. Every year, up to 50 million people suffer serious, life-altering injuries which, in many low- and middle-income countries.

Primary road safety risk factors in low and middle-income countries include:

1. Speeding
2. Drink-driving
3. Non-use, or improper use of helmets, and
4. Non-use, or improper use of seatbelts

Strengthening the capability of the road traffic police to enforce traffic laws is fundamental to deterring road users from violating the laws, to reduce harm and to reduce inappropriate and unsafe behaviors on the roads.

Basic road safety rules for students:

1. Aware of the road signals

Assist students to learn the traffic lights and signs. Check out the relevance of each color:

- Green light is an indication for "go"- Whenever the signal turns green, the vehicle can move ahead.
- Red light is an indication "to stop"- All the vehicles have to stop, when the red light is on.
- Yellow light is an indication "to slow down"- When the yellow light turns on, you should slow down your vehicle and prepare to stop.
- "Walking man" signal at intersections are constructed for the pedestrians. Recall the fact that you will be authorized to cross the road only when the signal turns green.
