Reading a map

Nowadays though locations are traced easily using GPS, (Global Positioning System) one should know what to look for in the map to reach the destination. Here are a few general instructions to be followed while reading a map.

1. Identify and understand the elements of the map correctly.
2. Look out for the title to know what the map shows.
3. Study the symbols / colours that are used on the map and find what they stand for.
4. Look at the scale of the map. (whether to be scaled or not to be scaled)
5. Look for the pointer to know the direction.

Let us together scale the summit. Here is a drawing of the Everest showing the way to the summit, and the position of the camps with their heights. Trace the trekking trail to reach the summit with the given details and write an interesting paragraph in about 100 words.

The Summit of Mount Everest
