4. Differentiate del with **remove()** function of List.
5. Write the syntax of creating a Tuple with n number of elements.
6. What is set in Python?

Part - III

Answer the following questions (3 Marks)

1. What are the difference between list and Tuples?
2. Write a shot note about **sort()**.
3. What will be the output of the following code?

```
list = [2**x for x in range(5)]
print(list)
```

4. Explain the difference between del and **clear()** in dictionary with an example.
5. List out the set operations supported by python.
6. What are the difference between List and Dictionary?

Part - IV

Answer the following questions (5 Marks)

1. What the different ways to insert an element in a list. Explain with suitable example.
2. What is the purpose of **range()**? Explain with an example.
3. What is nested tuple? Explain with an example.
4. Explain the different set operations supported by python with suitable example.
