Points to remember:

- ***SQL*** is a language that helps to create and operate relational databases.
- ***MySQL*** is a database management system.
- The various components of ***SQL*** are Data Definition Language (***DDL***), Data Manipulation Language (***DML***), Data Query Language (***DQL***), Transactional Control Language (***TCL***), Data Control Language (***DCL***).
- The ***DDL*** provides statements for creation and deletion of tables.
- The ***DML*** provides statements to insert, update and delete data of a table.
- The ***DCL*** provides authorization commands to access data.
- The ***TCL*** commands are used to manage transactions in a database.
- The ***DQL*** commands help to generate queries in a database.
- The ***CREATE TABLE*** command creates a new table.
