Note

Python's CSV module only accepts \r\n, \n or \r as line terminator

13.7.6 CSV File with quote characters

You can write the CSV file with custom quote characters, by registering new dialects using csv.register_dialect() class of csv module.

```
import csv
csvData = [['SNO','Items'], ['1','Pen'], ['2','Book'], ['3','Pencil']]
csv.register_dialect('myDialect',delimiter = '|',quotechar = '"',
    quoting=csv.QUOTE_ALL)
with open('c:\pyprg\ch13\quote.csv', 'w', newline'=') as csvFile:
    writer = csv.writer(csvFile, dialect='myDialect')
    writer.writerows(csvData)
print("writing completed")
csvFile.close()
```

When you open the "quote.csv" file in notepad, we get following output:

```
"SNO"|"Items"
"1"|"Pen"
"2"|"Book"
"3"|"Pencil"
```

In the above program, myDialect uses pipe (|) as delimiter and quotechar as doublequote '"' to write inside the file.

13.7.7 Writing CSV File Into A Dictionary

Using DictWriter() class of csv module, we can write a csv file into a dictionary. It creates an object which maps data into a dictionary. The keys are given by the fieldnames parameter. The following program helps to write the dictionary in to file.

```
import csv
data = [{'MOUNTAIN' : 'Everest', 'HEIGHT': '8848'},
    {'MOUNTAIN' : 'Anamudi ', 'HEIGHT': '2695'},
    {'MOUNTAIN' : 'Kanchenjunga', 'HEIGHT': '8586'}]
with open('c:\pyprg\ch13\peak.csv', 'w', newline'=') as CF:
fields = ['MOUNTAIN', 'HEIGHT']
    w = csv.DictWriter(CF, fieldnames=fields)
    w.writeheader()
    w.writerows(data)
    print("writing completed")
CF.close()
```
