PY5 – Display a string elements – using class

5. Write a program to accept a string and print the number of uppercase, lowercase, vowels, consonants and spaces in the given string using Class.

Aim: To accept a string and print the number of uppercase, lowercase, vowels, consonants and spaces in the given string using Class.

Coding:

```
class String:
    def __init__(self):
        self.upper=0
        self.lower=0
        self.vowel=0
        self.consonant=0
        self.space=0
        self.string=""
    def getstr(self):
        self.string=str(input("Enter a String: "))
    def count(self):
        for ch in self.string:
            if (ch.isupper()):
                self.uppercase+=1
            if (ch.islower()):
                self.lowercase+=1
            if (ch in ('AEIOUaeiou')):
                self.vowel+=1
            if (ch==""):
                self.spaces+=1
    self.consonant=self.upper+self.lower-self.vowel
    def display(self):
        print("The given string contains...")
        print("%d Uppercase letters"%self.upper)
        print("%d Lowercase letters"%self.lower)
        print("%d Vowels"%self.vowel)
        print("%d Consonants"%self.consonant)
        print("%d Spaces"%self.space)
```
