9 Create a sql table using python and accept 10 names and age .sort in descending order of age and display.

Aim: To create a sql table using python and accept 10 names and age. sort in descending order of age and display.

Coding:

```
import sqlite3

connection = sqlite3.connect("info.db")

cursor = connection.cursor()

cursor.execute("create table student(name, age)")

print("Enter 10 students names and their ages respectively:")

for i in range(10):

    who =[input("Enter Name:")]

    age =[int(input("Enter Age:"))]

    n =len(who)

    for i in range(n):

        cursor.execute("insert into student values (?, ?)", (who[i],age[i]))

cursor.execute("select * from student order by age desc")

print("Displaying All the Records From student Table in Descending order of age")

print (*cursor.fetchall(),sep='\n' )
```
