protection of the endangered species but aims to reduce the economic incentive that triggers the poaching of endangered species and the destruction of their habitat. Hence, the Convention seeks to eliminate this illicit market by decimating the end-user demand. The CITES, also called the Washington Convention entered into force in 1975.

Convention on Migratory Species, 1979

The Convention on the Conservation of Migratory Species of Wild Animals, also known as the Convention on Migratory Species (CMS) or the Bonn Convention, which came into force 1983, seeks to "conserve terrestrial, marine and avian migratory species throughout their range". It proposed strict protective measures for endangered migratory species. Besides, multilateral agreements for the conservation and management of migratory species along with cooperative research activities which constitute the mandate of the Convention. Appendix I of the Convention deals with the list of migratory species that are categorized as endangered which requires immediate international cooperation to mitigate the same. On the other hand, Appendix II is a composite of other species that require significant attention or benefit from international agreements under the Convention.

Vienna Convention for the Protection of Ozone Layer, 1985

The Vienna Convention for the Protection of the Ozone Layer is a multilateral environmental agreement, which kick-started global cooperation for the protection of Earth's ozone layer. It was adopted on 22 March 1985. Subsequently, the Montreal Protocol on Substances that Deplete the Ozone Layer was adopted on 16 September 1987 which came into effect in 1989. This international treaty looks into eliminating the use of ozone-depleting substances (ODS). The Ozone Secretariat located at Nairobi, Kenya is the Secretariat for both the Vienna Convention and Montreal Protocol.

World Commission on Environment and Development, 1987

The World Commission on Environment and Development (WCED), also known as the Brundtland Commission after its chairperson Gro Harlem Brundtland, helped chalk out the strategies for environmental conservation and sustainable development. Its final report titled Our Common Future, published in 1987 underscores the interdependence of environmental protection with other factors like economic development and energy production and have become the lynchpin of the international environmental law until now. The idea of sustainable development received the first-ever official definition under this initiative.

Basel Convention on Trans-boundary Movement of Hazardous Wastes, 1989

The Basel Convention which came into force in 1992, was a response to NIMBY (Not in My Back Yard) syndrome, that grappled the industrialized world in the 1980s with
