which help support green investment and provide cost-effective means to realize the emission targets.

World Summit on Sustainable Development, 2002

The UN-backed World Summit on Sustainable Development took place at Johannesburg, South Africa during August 26 – September 6, 2002. The Convention which was informally referred to as Earth Summit 2002 went on to resuscitate the spirit of its prequel by tabling new challenges and concerns that affect the environmental realm. This renewed environmentalism in the new format offered a sustainability-driven roadmap in addressing the problems of the millennium. The Johannesburg Declaration on Sustainable Development, the documental by-product of the summit, reemphasized the basic tenets of the multilateral initiatives in the past with more force. It postulated the necessity of a time-bound structure of actions expected from the member states over an array of agreements including Agenda 21. Moreover, the Convention succumbed to severe castigations from various quarters over its inability to bring any new arrangement of its own.

UN Conference on Sustainable Development, 2012

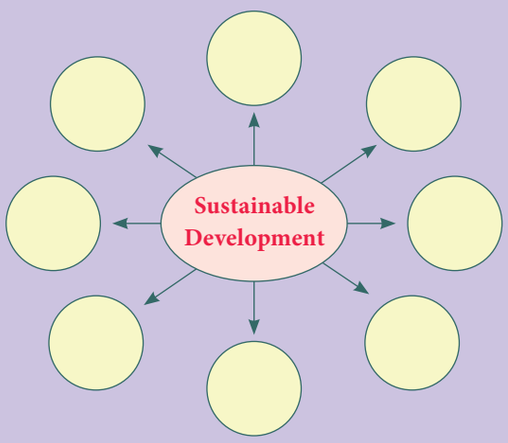

The UN Conference on Sustainable Development, also known as Rio+20, was held at Rio de Janeiro, Brazil on 20-22 June 2012. With its uncompromising stand on rolling out an affirmative sustainable development plan, the member states focussed on evolving a process for the development of Sustainable Development Goals (SDGs) that combines with Millennium Development Goals (MDGs). Moreover, the adoption of ground-breaking guidelines for green economy policies was another result of the Rio+20. The conference also sought to constitute an inter-governmental process under the General Assembly to frame a strategy concerning finance vis-à-vis sustainable development. An agreement to establish a high-level political forum for sustainable development was also achieved. The report of the conference was themed "The Future We Want".

UN Sustainable Development Summit, 2015

As a high-level plenary meeting of the UNGA, the UN Sustainable Development Summit, which spanned over 25-27 September 2015 at the UN Headquarters in New York, adopted the post-2015 agenda titled "Transforming our World: 2030 Agenda for Sustainable Development". It is a composite of a Declaration, 17 Sustainable Development Goals (SDGs) and 169 targets. The SDGs came into effect in 2016 and will guide the discourse on sustainable development until 2030.

Activity

Make a copy of diagrams complete it by naming eight types of Sustainable Development Goals (SDG)

Discuss - Why is it important for future generations that development should be sustainable?
