The Indigo revolt of 1859 – 60 in Bengal was one of the responses from the Indian farmer to the oppressive policy of the British. Indian tenants were forced to grow indigo by their planters who were mostly Europeans. Used to dye the clothes indigo was in high demand in Europe. Peasants were forced to accept meagre amounts as advance and enter into unfair contracts. Once a peasant accepted the contract, he had no option but to grow indigo on his land. The price paid by the planter was far lower than the market price. Many a times, the peasants could not even pay their land revenue dues. Hoping that the authorities would address their concerns, the peasants wrote several petitions to authorities and organised peaceful protests. As their plea for reform went in vain, they revolted by refusing to accept any further advances and enter into new contracts. Peasants, through the Indigo revolt of 1859-60, were able to force the planters to withdraw from northern-Bengal.

(c) Famines and Emigration of Indians to Overseas British Colonies

Famines

As India became increasingly de-industrialised and weavers and artisans engaged in handicrafts were thrown out of employment, there were recurrent famines due to the neglect of irrigation and oppressive taxation on land. Before the arrival of the British, Indian rulers had ameliorated the difficulties of the populace in times of famines by providing tax relief, regulating the grain prices and banning food exports from famine-hit areas. But the British extended their policy of non-intervention (laissez faire) even to famines. As a result, millions of people died of starvation during the Raj. It has been estimated that between 1770 and 1900, twenty five million Indians died in famines. William Digby, the editor of *Madras Times*, pointed out that during 1793-1900 alone an estimated five million people had died in all the wars around the world, whereas in just ten years (1891-1900), nineteen million had died in India in famines alone.

Sadly when people were dying of starvation millions of tonnes of wheat was exported to Britain. During the 1866 Orissa Famine, for instance, while a million and a half people starved to death, the British exported 200 million pounds of rice to Britain. The Orissa Famine prompted nationalist Dadabhai Naoroji to begin his lifelong investigations into Indian poverty. The failure of two successive monsoons caused a severe famine in the Madras Presidency during 1876-78. The viceroy Lytton adopted a hands-off approach similar to that followed in Orissa. An estimated 3.5 million people died in the Madras presidency.

Madras Famine

Indentured Labour

The introduction of plantation crops such as coffee, tea and sugar in Empire colonies such as Ceylon (Sri Lanka), Mauritius, Fiji, Malaya, the Caribbean islands, and South Africa required enormous labour. In 1815, the Governor of Madras received a communication from the Governor of Ceylon asking for "coolies" to work on the coffee plantations. The Madras Governor forwarded this letter to the collector of Thanjavur, who reported that the people were very much attached to the soil and unless some incentive was provided it was not easy to make them move out of their native soil. But the outbreak of two famines (1833 and 1843) forced the people, without any incentive from the government, to leave for Ceylon to work
