up in 1843 in Raiganj by Dwarakanath Tagore (1794–1847), grandfather of Rabindranath Tagore. The coal industry picked up after 1892 and its growth peaked during First World War years.

Dwarakanath Tagore

It was in the early twentieth century, industries in India began to diversify. The first major steel industry – Tata Iron and Steel Company (TISCO) – was set up by the Tatas in 1907 as a part of swadeshi effort in Sakchi, Bihar. Prior to this, a group of Europeans had attempted in 1875 to found the Bengal Iron Company. Following this, the Bengal Iron and Steel Company was set up in 1889. However, TISCO made a huge headway than the other endeavourers in this sector. Its production increased from 31,000 tons in 1912–13 to 1,81,000 tons in 1917–18.

The First World War gave a landmark break to the industrialisation of the country. For the first time, Britain's strategic position in the East was challenged by Japan. The traditional trade routes were vulnerable to attack. To meet the requirements, development of industries in India became necessary. Hence, Britain loosened its grip and granted some concessions to the Indian capitalists. Comparative relaxation of control by the British government and the expansion of domestic market due to the War, facilitated the process of industrialisation. For the first time, an industrial commission was appointed in 1916. During the war-period, the cotton and jute industries showed much growth. Steel industry was yet another sector marked by substantial growth.

Tata Iron and Steel Company

Other industries showing progress were paper, chemicals, cement, fertilisers, tanning, etc. The first Indian owned paper mill – Couper Paper Mill – was set up in 1882 in Lucknow. Following this, Itaghur Paper Mill and Bengal Paper Mill, both owned by Europeans, were established. Cement manufacturing began in 1904 in Madras with the establishment of South Indian Industries Ltd. Tanning industry began in the late nineteenth

Jamsetji Nusserwanji Tata, popularly known as J. N. Tata (1839–1904), came from a Parsi (Zoroastrian) business family in Navsari, Baroda. The first successful Indian entrepreneur, he is called the father of the Indian modern industry. In order to help his father's business, he travelled all over the world and this exposure helped him in his future endeavours. His trading company, established in 1868, evolved into the Tata Group. A nationalist, he called one of the mills established in Kurla, Bombay "Swadeshi". His children Dorabji Tata and Ratanji Tata followed his dream and it was Dorabji Tata who finally realised the long term dream of his father to establish an iron and steel company in 1907. His enthusiasm was such that he spent two years in US to learn from the American Iron Industrialists. His yet another dream to set up a hydroelectric company did not materialize during his life time. However, the first major Hydroelectric project – Tata Hydroelectric Company–was set up in 1910. With great foresight the Tatas founded the Indian Institute of Science, Bangalore.
