ICT CORNER

HUMAN HEALTH AND DISEASES

Let us do examine to know the chronic disease - systemic lupus erythematosus (SLE)

Procedure :

Step -1 : Type the **URL** or scan the **QR** code to open the activity page. Click **"To enter the lab"** to start the test.

Step -2 : Follow the interactive steps guided by the virtual lab starting from centrifugation and to **ELISA**.

Step -3 : On the right, Find the different headers such as **"Diagnosis, Background, Notebook**, Glossary and **Help"** and **click** to know the virtual procedure happening aside on the left.

Step – 4 : Find **"Launch Gene Body"** on the right bottom of the window, and Click it to analyse and understand about the cloning.

Step -5: Complete this **ELISA** to know a patient acquired the disease or not.
