

Natural honey is a colloidal sol. It is distinguished from artificial one by adding ammoniacal $AgNO_3$

In case of natural honey a metallic silver is produced, assumes a reddish yellow color due to traces of albumin or ethereal oil which acts as a protective colloid. In case of artificial honey a dark yellow or greenish yellow precipitate is formed.

EVALUATION

Choose the correct answer:

1. For Freundlich isotherm a graph of $\log \frac{x}{m}$ is plotted against log p. The slope of the line and its y – axis intercept respectively corresponds to

   a) $1/n$, k b) $\log 1/n$, k c) $1/n$, log k d) $\log 1/n$, log k

2. Which of the following is incorrect for physisorption?

   a) reversible b) increases with increase in temperature

   c) low heat of adsorption d) increases with increase in surface area

3. Which one of the following characteristics are associated with adsorption? (NEET)

   a) ΔG and ΔH are negative but ΔS is positive

   b) ΔG and ΔS are negative but ΔH is positive

   c) ΔG is negative but ΔH and ΔS are positive d) ΔG, ΔH and ΔS all are negative.

4. Fog is colloidal solution of

   a) solid in gas b) gas in gas c) liquid in gas d) gas in liquid

5. Assertion : Coagulation power of Al^{3+} is more than Na^{+}.

   Reason : greater the valency of the flocculating ion added, greater is its power to cause precipitation

   a) if both assertion and reason are true and reason is the correct explanation of assertion.

   b) if both assertion and reason are true but reason is not the correct explanation of assertion.

   c) assertion is true but reason is false d) both assertion and reason are false.

6. Statement :

   To stop bleeding from an injury, ferric chloride can be applied. Which comment about the statement is justified?
