Phenols:

Phenols are organic compounds in which a -OH group is directly attached to a benzene ring. The carbon bearing the -OH group is sp^2 hybridized.

Table: Classification of phenols

Monohydric Phenol	Monohydric phenols  Common Name: Phenol; o -cresol; m-cresol; p-cresol IUPAC Name : Phenol; 2-methyl phenol; 3-methyl phenol; 4-methyl phenol
Dihydric Phenol	Dihydric phenols  Common Name: Catechol; Resorcinol; Quinol IUPAC Name: 1,2-dihydroxybenzene; 1,3-dihydroxybenzene; 1,4-dihydroxybenzene
Trihydric Phenol	Trihydric phenols  Common Name: Pyrogallol; Hydroxyquinol; Phloroglucinol IUPAC Name: 1,2,3-trihydroxybenzene; 1,2,4-trihydroxybenzene; 1,3,5-trihydroxybenzene
Substituted phenol	Substituted phenols  o-amino phenol; o-hydroxy Benzaldehyde; p-hydroxy benzoic acid; Orcinol(or) 3,5-Dihydroxy toluene
