11. In his classic experiments on Pea plants, Mendel did not use
    a) Flowering position b) Seed colour
    c) Pod length d) Seed shape
12. The epistatic effect, in which the dihybrid cross 9:3:3:1 between AaBb X AaBb is modified as
    a) Dominance of one allele on another allele of both loci
    b) Interaction between two alleles of different loci
    c) Dominance of one allele to another alleles of same loci
    d) Interaction between two alleles of same loci
13. In a test cross involving F_1 dihybrid, more parental type offspring were produced than the recombination type offspring. This indicates
    a) The two genes are located on two different chromosomes
    b) Chromosomes failed to separate during meiosis
    c) The two genes are linked and present on the same chromosome
    d) Both of the characters are controlled by more than one gene
14. The genes controlling the seven pea characters studied by Mendel are known to be located on how many different chromosomes?
    a) Seven b) Six
    c) Five d) Four
15. Which of the following explains how progeny can posses the combinations of traits that none of the parent possessed?
    a) Law of segregation
    b) Chromosome theory
    c) Law of independent assortment
    d) Polygenic inheritance
16. "Gametes are never hybrid". This is a statement of
    a) Law of dominance
    b) Law of independent assortment
    c) Law of segregation
    d) Law of random fertilization
17. Gene which suppresses other genes activity but does not lie on the same locus is called as
    a) Epistatic b) Supplement only
    c) Hypostatic d) Codominant
18. Pure tall plants are crossed with pure dwarf plants. In the F_1 generation, all plants were tall. These tall plants of F_1 generation were selfed and the ratio of tall to dwarf plants obtained was 3:1. This is called
    a) Dominance b) Inheritance
    c) Codominance d) Heredity
19. The dominant epistatis ratio is
    a) 9:3:3:1 b) 12:3:1
    c) 9:3:4 d) 9:6:1
20. Select the period for Mendel's hybridization experiments
    a) 1856 - 1863 b) 1850 - 1870
    c) 1857 - 1869 d) 1870 - 1877
21. Among the following characters which one was not considered by Mendel in his experimentation pea?
    a) Stem – Tall or dwarf
    b) Trichomal glandular or non-glandular
    c) Seed – Green or yellow
    d) Pod – Inflated or constricted
22. Name the seven contrasting traits of Mendel.
23. What is meant by true breeding or pure breeding lines / strain?
24. Give the names of the scientists who rediscovered Mendelism.
25. What is back cross?
26. Define Genetics.
