reducing nausea of cancer patients undergoing radiation and chemotherapy. THC provides relief to bronchial disorders, especially asthma as it dilates bronchial vessels. Because of these medicinal properties, cultivation of cannabis is legalized in some countries. However, prolonged use causes addiction and has an effect on individual's health and society. Hence most of the countries have banned its cultivation and use.

Narcotics Control Bureau (NCB)

Drugs come in various forms and can be taken in numerous ways. Some are legal and others are not. Drug abuse and misuse can cause numerous health problems and in serious cases death can occur.

The Narcotics Control Bureau (NCB) is the nodal drug law enforcement and intelligence agency of India and is responsible for fighting drug trafficking and the abuse of illegal substances.

10.11 Entrepreneurial Botany

Entrepreneurial Botany is the study of how new businesses are created using plant resources as well as the actual process of starting a new business. An **entrepreneur** is someone who has an idea and who works to create a product or service that people will buy, by building an organization to support the sales. **Entrepreneurship** is now a popular topic for higher secondary students, with a focus on developing ideas to create new ventures among the young people.

Vast opportunities are there for the students of Botany. In the present scenario students should acquire ability to merge skills and knowledge in a meaningful way. Converting botanical knowledge into a business idea that can be put into practice for earning a livelihood is the much-needed training for the students.

This part of chapter is aimed to help the students to acquire such skills with practical knowledge to start a few activities of entrepreneurship.

10.11.1 Mushroom cultivation

Malnutrition caused by the lack of adequate protein and other nutrients in daily diet of people is becoming a major health hazard in developing countries. Under such circumstances, mushroom being a rich source of protein and other nutrients can be a part and parcel of every day's food.

Mushrooms are the **fruiting body** of edible fungi and is the most priced commodity among vegetables, not only because of its nutritive value but also for its characteristic aroma and flavor. Mushrooms are also called **white vegetable**. Mushroom cultivation has great scope in India and in other developing countries. Mushroom cultivation activities can play an important role in supporting the local economy. Selling mushroom in a local market form a source of additional income to the family.

Figure 10.22: Mushroom Cultivation

Steps involved in mushroom cultivation

- The straw used for composting should be ripe and golden-yellow in colour. It should be cut into 2-4 inches and properly sterilized.
- The culture space should be clean and the ventilators and windows should be covered with fine wire mesh to prevent the entry of flies and birds.
