iii) Case Study Method

Trainees are described a situations which stimulate their interest to find solution. They have to use their theoretical knowledge and practical knowledge to find solution to the problem presented. There is no single solution to the problem. It may vary depending upon view points of trainees. In short, the purpose of case study method is, to make trainee apply their knowledge.

iv) Role Play Method

Under this method trainees are explained the situation and assigned roles. They have to act out the roles assigned to them without any rehearsal. There are no pre-prepared dialogues. Thus they have to assume role and play the role without any preparation. For example the role of customer and salesman, management and union leader, foreman and worker etc. may be played in the training arrangements. The moderator after observing the role played gives his views to the role players.

v) Seminar/Conference Method

This method enables the trainees to listen to the lectures / talk delivered on specific topics and provides opportunities to participate, to interact with the speaker and get their doubts clarified or select participants may be allowed to present papers with the audio visual aids as delegates. They share their rich experience at the seminar through their papers. Thus participants can widen and deepen their knowledge by their active participation at the conference. e.g. Doctors conference, Salesman Conference etc., This is one of the oldest method, but still a favorite training method.

vi) Field Trip Method

A field trip or field work or training in the field is a journey undertake by a group of employees/ trainees to a place away from their actual work site. In other words, trainees are taken to actual workplace/ site/facility to gain exposure and knowledge. They are explained the process of work by supervisor/ manager of the facility visisted by the partipants. They are free to clarity their doubts from the organization experts. This method helps the trainees to strengthen their theoretical knowledge obtained in a class room evironment by practical exposure.
