In simple words marketing mix means a marketing programme that is offered by a firm to its target consumers to earn profits through satisfaction of their wants. Such a marketing programme is a mixture of four ingredients, namely Product mix, Price mix, Place (Distribution)mix and Promotion mix.

14.09 Elements of Marketing of Mix

Let us discuss these 4 elements of marketing mix in detail.

i. Product

Product is the main element of marketing. Without a product, there can be no marketing.

ii. Price

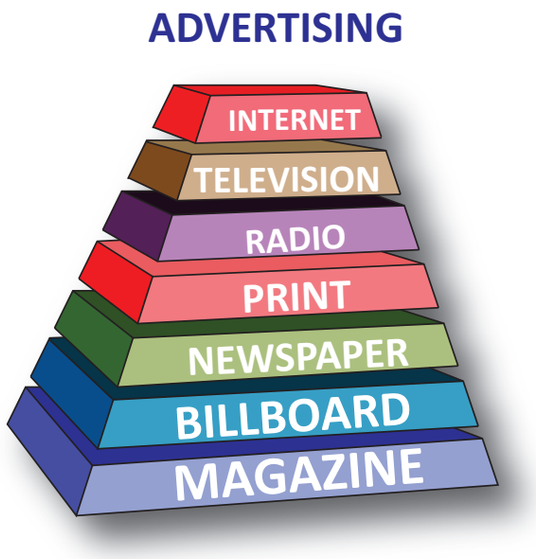

Price is the value of a product expressed in monetary terms. It is the amount charged for the product.

iii. Place (Physical Distribution)

An excellent quality product, with a competitive price structure, backed up by efficient promotional activities, will be a waste if it is not moved from the place of production to the place of consumption at an appropriate time. The fourth element of product mix, namely place or physical distribution facilitates the movement of products from the place of manufacture to the place of consumption at the right time.

iv. Promotion

An excellent product with competitive price cannot achieve a desired success and acceptance in market, unless and until its special features and benefits are conveyed effectively to the potential consumers.

14.10. Marketing Mix Matrix

The principle of the 4P Matrix is that marketing decisions usually fall into four controllable categories: product, place, price and promotion. Carefully positioning the product in each category will generate a better response from the target market.
