	Test for amines		
14	**Dye test:** Take a small amount of an organic substance in a clean test tube, add 2 ml of HCl to dissolve it. Add few crystals of $NaNO_2$, and cool the mixture in ice bath. Then add 2 ml of ice cold solution of β-naphtholin NaOH.	Scarlet red dye is obtained.	Presence of an aromatic primary amine
	Test for diamide		
15	**Biuret test:** Take a small amount of an organic compound in a test tube. Heat strongly and then allow to cool. Dissolve the residue with 2 ml of water. To this solution add 1 ml of dilute copper sulphate solution and few drops of 10% NaOH solution drop by drop.	Violet colour is appeared.	presence of a diamide
	Test for carbohydrates		
16	**Molisch's test:** Take a small amount of an organic compound in a test tube. It is dissolved in 2 ml of water. Add 3-4 drops of alpha naphthol to it.Then add conc H_2SO_4 through the sides of test tube carefully.	Violet or purple ring is formed at the junction of the two liquids.	Presence of carbohydrate
17	**Osazone test:** Take a small amount of an organic compound in a test tube. Add 1 ml of phenyl hydrazine solution and heat the mixture for about 5 minutes on a boiling water bath.	Yellow crystals are obtained	Presence of carbohydrate

Report:

The given organic compound contains /is

(i) Aromatic / aliphatic

(ii) Saturated / unsaturated

(iii) _____ functional group
