coordination compounds
Isomerisms
structural
Stereo isomerim
Geometrical isomerism
Optical isomerism
theories of coordination compounds
Werner's Theory
Hybridisation
Primary valency
Secondary valency
VBT
CFT
Oh Splitting of d orbitals
Td Splitting of d orbitals
Applications of coordination compounds
Stability of cordination complexes
IUPAC Nomenclature
Terms
Cental metal ion (CMI)
Ligands
Coordination sphere
Coordination polyhedron
Charge on a complex
