requirements for reproductive health, one is adviced to use them to avoid pregnancy or to delay or space pregnancy.

Diseases or infections transmitted through coitus are called Sexually transmitted infections (STIs). Pelvic inflammatory diseases (PIDs), still birth, infertility are some of the complications of STDs. Early detection facilitates better cure of these diseases. Avoiding coitus with unknown/ multiple partners, use of condoms during coitus are some of the simple precautions to avoid contracting STIs.

Inability to conceive or produce children even after unprotected sexual cohabitation is called infertility. Various methods are now available to help such couples. *In vitro* fertilization followed by transfer of embryo into the female genital tract is one such method.
