ICT CORNER

MOLECULAR GENETICS

Lets us explore the gene expression

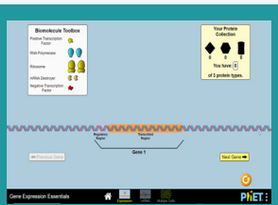

Procedure :

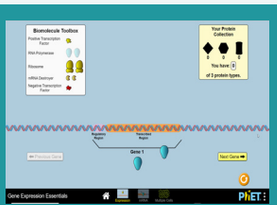

Step 1: Use the URL or scan the QR Code to launch the "Gene Expression Essentials" activity page.

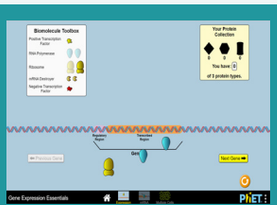

Step 2: Click "Expression" pick the genetic material from the Biomolecule Toolbox, understand the changes for the three different genes.

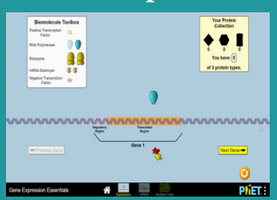

Step 3: Click "mRNA" and slide through the slider in Positive Transcription factors and Negative Transcription factors such as Concentration, Affinity. Also Slide through "Affinity" in RNA Polymerase.

Step 4: Click "Multiple Cells" and find the average protein level vs Time in the graph indicated above.

Step 1

Step 2

Step 3

Step 4
