18. AUTOSOMAL ANOMALY – PATAU'S SYNDROME

IDENTIFICATION

The given photograph is identified as Patau's Syndrome.

COMMENTS

1. It is one of the autosomal aneuploids formed due to trisomic condition of chromosome 13.
2. It is caused by meiotic non-disjunction of chromosomes.
3. The symptoms are multiple and severe body malformation with profound mental deficiency.
4. The individuals have small head with small eyes, cleft palate and malformation of brain.

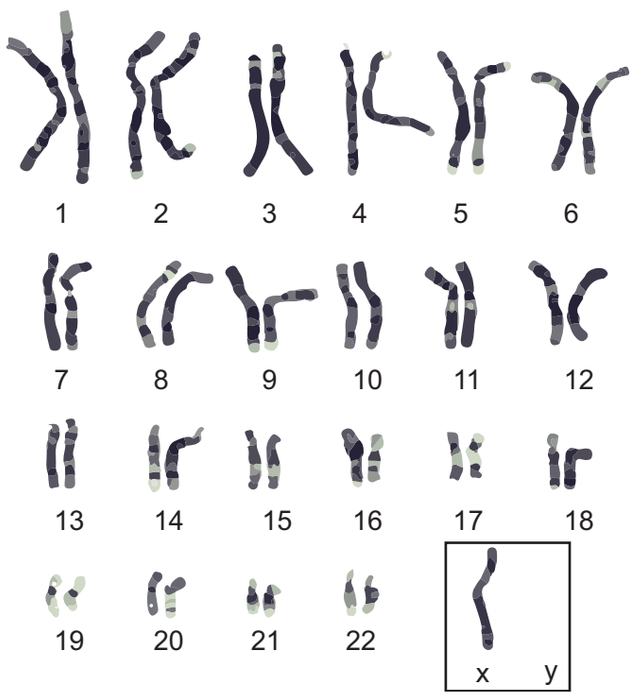

19. SEX CHROMOSOMAL ANOMALY - TURNER'S SYNDROME

IDENTIFICATION

The given photograph is identified as Turner's syndrome.

COMMENTS

1. This genetic disorder is due to the loss of an X chromosome resulting in a karyotype of 44A+XO = 45.
2. It is caused due to meiotic non-disjunction of allosomes.
3. These individuals are sterile female with short stature and webbed neck.
4. They also have under developed breasts and gonads with lack of menstrual cycle during puberty.
