For example :

To display the students in alphabetical order of their names, the command is used as

SELECT * FROM Student ORDER BY Name;

The above student table is arranged as follows :

Admno	Name	Gender	Age	Place
104	Abinandh	M	18	Chennai
101	Adarsh	M	18	Delhi
102	Akshith	M	17	Bangalore
100	Ashish	M	17	Chennai
103	Ayush	M	18	Delhi
106	Devika	F	19	Bangalore
107	Hema	F	17	Chennai
105	Revathi	F	19	Chennai

Note

The ORDER BY clause does not affect the original table.

12.7.5.6 WHERE clause

The **WHERE** clause is used to filter the records. It helps to extract only those records which satisfy a given condition. For example in the student table, to display the list of students of age18 and above in alphabetical order of their names, the command is given as below:

SELECT * FROM Student WHERE Age>=18 ORDER BY Name;

Admno	Name	Gender	Age	Place
104	Abinandh	M	18	Chennai
101	Adarsh	M	18	Delhi
103	Ayush	M	18	Delhi
106	Devika	F	19	Bangalore
105	Revathi	F	19	Chennai

To display the list of students in the descending order of names of those students of age 18 and above the command is given as :

SELECT * FROM Student WHERE Age>=18 ORDER BY Name DESC;
