Buttons in the output

In the output figure, you can see few buttons at the bottom left corner. Let us see the use of these buttons.

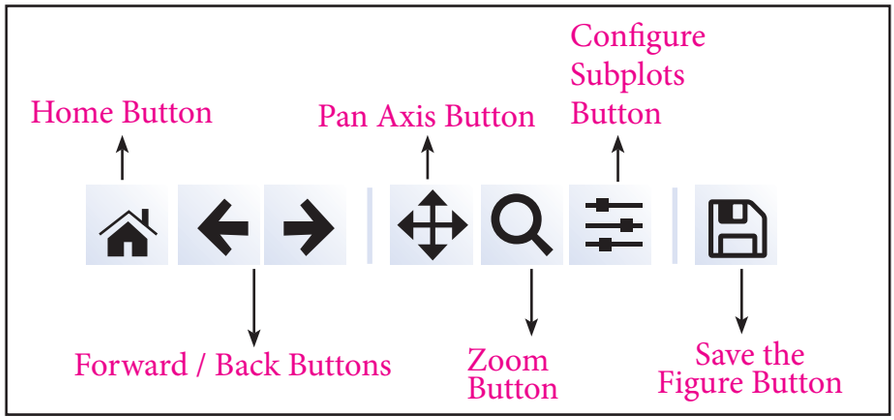

Figure 16.4

Home Button → The Home Button will help once you have begun navigating your chart. If you ever want to return back to the original view, you can click on this.

Forward/Back buttons → These buttons can be used like the Forward and Back buttons in your browser. You can click these to move back to the previous point you were at, or forward again.

Pan Axis → This cross-looking button allows you to click it, and then click and drag your graph around.

Zoom → The Zoom button lets you click on it, then click and drag a square that you would like to zoom into specifically. Zooming in will require a left click and drag. You can alternatively zoom out with a right click and drag.

Configure Subplots → This button allows you to configure various spacing options with your figure and plot.

Save Figure → This button will allow you to save your figure in various forms.

16.3 Special Plot Types

Matplotlib allows you to create different kinds of plots ranging from histograms and scatter plots to bar graphs and bar charts.

Line Chart

A Line Chart or Line Graph is a type of chart which displays information as a series of data points called 'markers' connected by straight line segments. A Line Chart is often used to visualize a trend in data over intervals of time – a time series – thus the line is often drawn chronologically.
