Output:

Enter a String: school

The reverse of the given string is: loohcs

Result:

Thus the Python program to reverse the string has been done and the output is verified.

PY3 – Generate values and remove odd numbers

3 **Write a program to generate values from 1 to 10 and then remove all the odd numbers from the list.**

Aim: To generate values from 1 to 10 and then remove all the odd numbers from the list.

Coding:

```
num = list(range(1,11))
print("Numbers from 1 to 10.....\n",num)
for i in num:
        if(i%2 == 1):
                num.remove(i)
print("The values after removing odd numbers.....\n",num)
```

Output:

Numbers from 1 to 10.....

[1, 2, 3, 4, 5, 6, 7, 8, 9, 10]

The values after removed odd numbers.....

[2, 4, 6, 8, 10]

Result:

Thus the Python program to generate values from 1 to 10 and then remove all the odd numbers from the list has been done and the output is verified.
