3) Mesophytes 4) Epiphytes and 5) Halophytes. The dissemination of seeds and fruits to various distances from the parent plant is called **seed and fruit dispersa**l. It takes place with the help of ecological factors such as wind, water and animals.

Evaluation

1. Arrange the correct sequence of ecological hierarchy starting from lower to higher level.
   a) Individual organism → Population Landscape → Ecosystem
   b) Landscape → Ecosystem → Biome → Biosphere
   c) community → Ecosystem → Landscape → Biome
   d) Population → organism → Biome → Landscape

2. Ecology is the study of an individual species is called
   i) Community ecology ii) Autecology
   iii) Species ecology iv) Synecology
   a) i only b) ii only
   c) i and iv only d) ii and iii only

3. A specific place in an ecosystem, where an organism lives and performs its functions is
   a) habitat b) niche
   c) landscape d) biome

4. Read the given statements and select the correct option.
   i) Hydrophytes possess aerenchyma to support themselves in water.
   ii) Seeds of *Viscum* are positively photoblastic as they germinate only in presence of light.
   iii) Hygroscopic water is the only soil water available to roots of plant growing in soil as it is present inside the micropores.
   iv) High temperature reduces use of water and solute absorption by roots.
   a) i, ii, and iii only b) ii, iii and iv
   c) ii and iii only d) i and ii only

5. Which of the given plant produces cardiac glycosides?
   a) Calotropis b) *Acacia*
   c) *Nepenthes* d) *Utricularia*

6. Read the given statements and select the correct option.
   i) Loamy soil is best suited for plant growth as it contains a mixture of silt, sand and clay.
   ii) The process of humification is slow in case of organic remains containing a large amount of lignin and cellulose.
   iii) Capillary water is the only water available to plant roots as it is present inside the micropores.
   iv) Leaves of shade plant have more total chlorophyll per reaction centre, low ratio of chl *a* and chl *b* are usually thinner leaves.
   a) i, ii and iii only b) ii, iii and iv only
   c) i, ii and iv only d) ii and iii only

7. Read the given statements and select the correct option.
   Statement A : Cattle do not graze on weeds of *Calotropis*.
   Statement B : *Calotropis* have thorns and spines, as defense against herbivores.
   a) Both statements A and B are incorrect.
   b) Statement A is correct but statement B is incorrect.
   c) Both statements A and B are correct but statement B is not the correct explanation of statement A.
   d) Both statements A and B are correct and statement B is the correct explanation of statement A.

8. In soil water available for plants is
   a) gravitational water
   b) chemically bound water
   c) capillary water
   d) hygroscopic water
