CSIR Aroma Mission of India

The Council of Scientific and Industrial Research (CSIR) has Catalyzing Rural Empowerment through Cultivation, Processing, Value Addition and Marketing of Aromatic Plants". This program has contributed significantly in the development, nurturing and positioning of essential oil-based aroma industry in the country. This has led to creation of an ecosystem benefitting the industry, farmers and next generation entrepreneurs. The activities are pursued in a synergistic mode with the organization in public and private set ups. This program has also paved way for developing entrepreneurship in different parts of the country through cultivation and commercial utilization of aromatic crops.

II. Cultivation of Aromatic plant - *Cymbopogon citratus*(Lemongrass)

Lemongrass is a tropical herb packed with strong citrus flavor. The lemon taste is prized in Asian cooking, as well as in tea, sauces, and soups.

Figure 10.27: Lemon grass

Economic part: Stem base and leaves.

Major constituents: Citronella, geraniol and citronellol.

Uses: The aromatic oil has flavouring properties and is used in perfumery, cosmetics, confectionary, beverages, mosquito repellents and toilet cleaners.

Soil and Climate: Lemongrass grow well in full sun, with plenty of water, in a rich, well-draining soil.

Planting: This plant can thrive well all through the year. Fill planting holes with composted manure to improve fertility and enhance the soil's ability to hold water. If you're adding several lemongrass plants to planting beds, space plants 60 cm apart.

Irrigation: Water requirements for this plant will vary dependent upon the type of soil they grow. Sandy, loose soils require more frequent watering than silty loam.

Harvest: Start harvesting as soon as plants are 30 cm tall and stem bases are at least 1.5 cm thick. Cut stalks at ground level.

Summary

Early civilization in different parts of the world has domesticated different species of plants for various purposes. Based on their utility, the economically useful plants are classified into food plants, fodder plants, fibre plants, timber plants, medicinal plants, and plants used in paper industries, dyes and cosmetics.

However, food base of majority of the population depends on very few Cereals, Millets, Pulses, Vegetables, Fruits, Nuts, Sugars, Oil seeds, Beverages, Spices and Condiments.

Oils can be classified into two types namely, essential oils and vegetable oils. Fatty acids in oil may be saturated or unsaturated. The oil yielding plants are groundnut, sesame, sunflower, coconut and mustard. The oils are used in cooking, making soaps and other purposes. Beverages contain alkaloids that stimulate central nervous system. Non alcoholic beverages are coffee, tea and cocoa. Spices were used throughout the world for several years. Cardamom is 'Queen of Spices' used for flavouring confectionaries and beverages. Black pepper is King of Spices.

Botanically a fibre is a long, narrow, thick walled cell. It is classified based on uses: textile fibres, brush fibres, plaiting fibres and
