Multiple bar Diagram

Multiple bar diagrams are constructed to represent two or more variables for the purpose of comparison. For example, a multiple bar diagram may be constructed to show proportion of males and females in the total, rural and urban population or the share of canal, tube well and well irrigation of the total irrigated area in different states or yield of rice, wheat sugar cane, coffee in the different states of a country, etc.

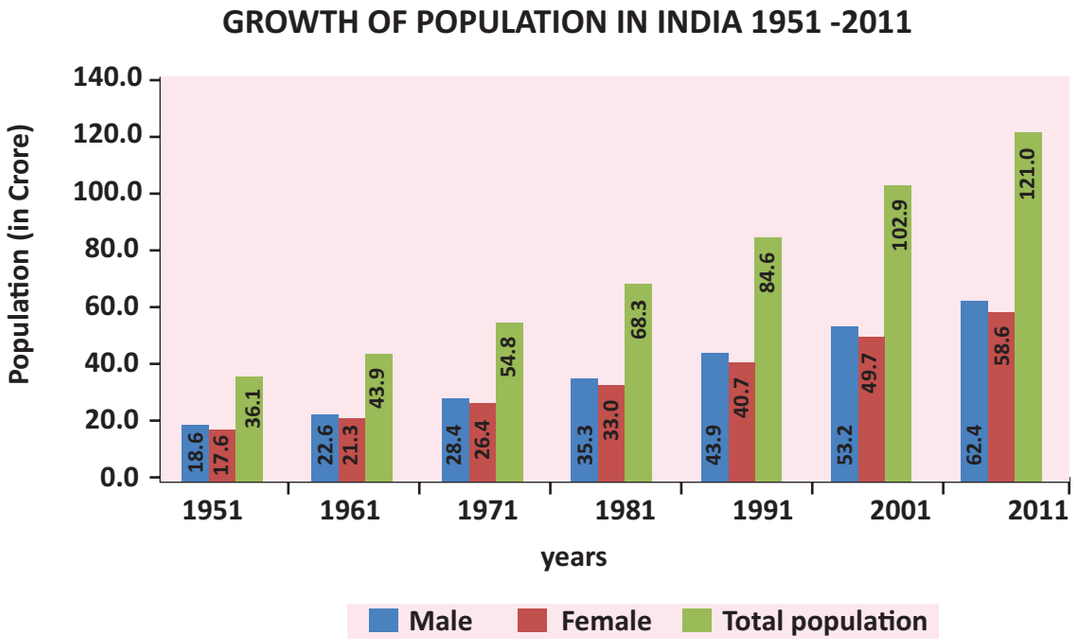

Example 12.4

Construct a Multiple Bar diagram to represent the data given in Table 12.4.

Table 12.4: Population of India from 1951-2011

Year	Male	Female	Total population
1951	185,528,462	175,559,628	361,088,090
1961	226,293,201	212,941,570	439,234,771
1971	284,049,276	264,941,570	548,159,652
1981	353,374,460	329,954,637	683,329,097
1991	439,358,440	407,062,599	846,421,039
2001	532,223,090	496,514,346	1,028,737,436
2011	623,724,248	586,469,174	1,210,193,422
